**Racing Name:** GENNADY  
**Microchip:** 956000004054462

Bosley (previously a special needs dog) has become a "Special Care Dog". He had a bout of renal failure prior to his entry to Gap, but his kidneys are now functioning normally and to keep them this way he needs to eat a lower protein diet (so steer clear of red meat or mince). Bosley was eating a special Renal diet but is now enjoying normal dog food (minus red meat). For the best care - our Vet recommends blood tests in 3 and 6 months after Adoption and then yearly. She is happy to discuss his health if you have questions.

Bosley is now ready to meet his new family, a sweet boy and very gentle, he LOVES squeaky toys and plushy beds. Bosely thinks he should do well in a home with or without another canine buddy and wee humans over the age of 5 years. Bosley has asked us to find him a home with no kitty cats.

Boy is a super affectionate soul who adores everyone he meets. When he walks up to you he has a goofy look on his face and a very wiggly bottom. He is very gentle and just wants to be loved in all ways possible. He has learnt that a home is a fun place to be and is about 80% toilet trained. Boy is looking for a home where he can be the only doggy, he is not a fan of sharing the affection he thinks should be all his. Boy thinks living in a home with kids over the age of 5 years old should be totally fun.
